WRITING

Hi to all readers of our school magazine! Today, we are gonna talk about the advantages and disadvantages of parents' educating their children at home. What do you think about this theme? You can ~~to~~ send us an email about it!

~~So, all of us have a parents. They are strict at someone, and someone is not. So, most of us go to school everyday, communicates with his friends, goes to classes and lives a normal life. But not all children have this opportunity. For different reasons (including health) some students~~

choose home learning.

Home learning allows you to choose free schedule and time for study. This is suitable for children with health disabilities or mental disabilities. No one prohibits going to home-educating for people, who have a lot of work.

At home learning you can make a priorities for favourite subjects and don't waste your time. But this type of studying has such a disadvantages as the lack of society. Therefore, it's not suitable for everyone.

I think, that going to school is much better and interesting, than sitting at home. Because in this way you are experiencing life to the full.
